

## Denny Machette Pizarro

Denny has been creating jewelry in metals for over 20 years. Her craft has been nurtured by many excellent instructors, both in person and virtual! What began as an experiment in fusing of dichroic glass has evolved into working with precious stones and metals. She uses traditional metal smithing tools: Torches, hammers and saws; however, she is always seeking new ways to join metals and components without the use of the torch. Students are provided with all of the materials and tools necessary. Students will learn how to safely create jewelry using specialized tools as well as household alternatives, and ways to form, manipulate and texturize metals to create unique and beautiful jewelry.

### **Brand new class being offered in February: Silver Dangle Earrings with Denny Machette Pizarro**

Create up to 2 (two) pairs of sterling silver earrings in this 3 (three) hour class. Using provided tools and materials learn how to accurately measure, texturize and cut your metal. Students will have access to glass beads to add color to their creations. Bring your imagination, creativity and learn how you can make jewelry at home with minimal tools and materials!!! It's fun and you will leave with something for you or your bestie.
